WANTED:
Java Backend Developer for German Company

We are looking for qualified web developers with proficient experience for German companies! Are you confident with today's web technologies and curious to develop the technology of tomorrow? Send us your application right away to info@diebold.it. Please highlight your work experience from past projects in the application.

Your tasks:

- Design and Implementation of code in Java, OO-based design, and development
- Development and testing of high-quality product features Spring Boot, Hibernate, REST, Maven, and Git
- Work with engineering managers, architects, engineers & QA to develop innovative solutions that meet market needs with respect to functionality, performance, reliability, realistic implementation schedules, and adherence to development goals and principles
- Ensuring all deliverables adhere to the timelines, quality, and performance

Qualifications:

We don't really believe in formal degrees in the world of computer science. We are interested in your unique work experience! Show us projects of yours and tell us what you are most passionate about! You should bring multiple years of work experience with you.

You should be skilled in:

- Java, Java Spring Boot & SQL
- Maven, Git
- Docker, Kubernetes, Azure/AWS
- Analytic thinking and independent working
- Fluent English, German is a bonus
- Willing to work in international teams

What we offer:

- Remote, stable job
- Changing projects
- Home office where applicable
- Well paid salary
- Salary is paid in stable Euros

We are looking forward to your application!

Speak to you soon!
Johannes
